Technical Skills

- **Core skills:** Core Java , J2EE , Hibernate , Spring Boot , Spring Web , Spring Data JPA , MicroServices, SQL , DSA.
- **Frontend Tech:** React JS & Redux, Javascript , CSS , HTML .
- **Tools:** MYSQL, PostgreSQL , Git/Github, Maven , POSTMAN , Docker , AWS EC2.

Education

Master of Computer Application

Pimpri Chinchwad College Of Engineering (SEM I - CGPA: 8.7)

August 2023 - Present

Pune, MH

Bachelor of Commerce (Computer Application)

Govindram Seksaria College of Commerce(CGPA: 8.83/10)

July 2018 – June 2021

Wardha, MH

High School Education - PCM + Computer Science

Janki Devi Bajaj College of Science (Percentage : 61%)

July 2017 – June 2018

Wardha, MH

Experience & Responsibilities

Tata Consultancy Services Pvt. Ltd, Pune

Process Associate

Aug 2021 – Nov 2023

Pune, MH

- Responsible for developing and maintaining the mortgage account management system, implementing core functionalities such as deposit, withdrawal, and balance retrieval.
- Addressed potential issues such as transactional issues, insufficient balance, and lost updates through careful exceptional and error handling.
- Developed and implemented robust data validation strategies in Spring Boot applications, ensuring the integrity and security of user inputs. Implemented both custom and global exceptions to enhance the reliability and stability of the system.
- Designed and implemented a search API for transaction management, ensuring efficient retrieval of transactions based on specified criteria such as date ranges, transaction types, and other filters. Focused on optimizing the search process to handle large datasets effectively, resulting in reduced response time for retrieval of transaction records using Spring Data JPA and pagination.
- Experience in development/deployment, application setup, bug fixing, and supporting applications.

Projects

Product Manager API

ReactJS – J2EE – SpringBoot – RestFul API – MySql

- Developed user interfaces using ReactJS to facilitate efficient management of product data.
- Architected a robust RestFul API to enable seamless CRUD operations on product entities.
- Executed integration of Rest API endpoints using Axios for effective frontend-backend communication.
- Utilized MySql database management system to ensure secure and scalable data storage.

Realtime ChatApp

ReactJS – J2EE – SpringBoot – WebSocket

- Engineered WebSocket functionality to establish real-time bidirectional communication between clients and servers.
- Led the development of a highly adaptable and organized frontend interface to enhance user experience.
- Implemented RESTful APIs to support seamless integration of real-time communication features.

Personal Achievements & Certifications

- **Problem Solving** - HackerRank
- **React JS Java Spring Boot Full Stack** - Udemy

Problem Solving

- Solved over 250 questions on LeetCode, GeeksforGeeks, and HackerRank.
